About This Procedure

This procedure provides instructions for accessing and operating the Travel System's (TRVL) online inquiry component. The following information will help you to use the procedure more effectively and to locate further assistance if needed.

How This Procedure Is Organized

The primary sections of the procedure are described below:

System Overview And Access describes what the system is used for and provides related background information. It also provides access security information and instructions for accessing the system.

Operating Features describes the system's design and how to use its operating features.

The **Inquiry Menu Screen** gives instructions for selecting the main options (tasks).

Instructions for each Submenu and Option are provided under a separate heading. All options on a submenu are covered before going to the next option on the main menu. The screens for system menus and options are presented as figures within the text.

The **Exhibits** include illustrations of system generated reports, and screens, or other graphic information.

Pages are numbered consecutively at the bottom from **About This Procedure** through the end of the procedure. If the procedure is amended, point pages (e.g., 12.1, 12.2, etc.) are used as needed to accommodate additional pages. All amended pages are marked at the bottom with the amendment number and date. If you begin receiving this procedure after it has been amended, you will receive the original copy with all amendments. Remove and insert pages according to the attached Page Control Chart so that your procedure is current.

You may occasionally receive bulletins to supplement information in this procedure. Each bulletin should be filed in front of the procedure and retained until the expiration date shown at the bottom of the bulletin.

What Conventions Are Used

This procedure uses the following conventions:

- **Messages** displayed by the system are printed in *italics*. Example: The message *No Post audit for this voucher* is displayed.
- Field specifications are also printed in italics. Example: **Enter User ID** (*required, alphanumeric field; max. of 8 positions*). Key in your assigned user ID.
- Data that is system generated or that you must key in exactly as shown is printed in ***bold italics***. Example: Key in ***TRVL***.
- Emphasized text within a paragraph is printed in bold. Example. Key in your **new** password.
- Figure references printed in bold link the figures with the text. Example: Instructions for using the Inquiry Menu Screen (**Figure 5**) are shown below.
- References to sections within the procedure are printed in bold. Example: See **Exhibit** for a sample of the report.
- Keyboard references are printed in brackets. Examples: Press [Enter]. Press [PF6].
- Optional actions at the end of a processing function are preceded by square bullets. Example:
 - To display the next page, press [Enter].
- Important extra information is identified as a note. Example: **Note:** If the authorization is for multiple travelers, press [PF4] to view the list of travelers covered under the authorization. Instructions for viewing this information are provided at the end of this process under **Viewing Multiple Travelers For A TDY Authorization**.

Who To Contact For Help

For questions about processing or reports, contact the Travel and Transportation Section (TTS) at **504-255-4878**.

For questions about the system (including help with system problems or obtaining access authority), contact Information Center personnel at **504-255-5230**.

For questions about this procedure, contact the Directives and Analysis Branch at **504-255-5322**.

Travel System Online Inquiry**

System Overview And Access

USDA's Travel System (TRVL) contains an online inquiry component which enables users to query the travel records stored on the mainframe at the National Finance Center (NFC). This menu driven software allows users to view information related to authorizations, advances, vouchers, third party transportation costs, advance and voucher history, relocation income tax allowances, and demand letters.

The key data elements for TRVL online inquiry are the authorization number and the traveler's social security number. An authorization is issued for each trip and all information in the system about that authorization is linked to the authorization number. The authorization number and/or the traveler's social security number are used to access travel data. When the authorization number and social security number are not known, the system allows a name search to obtain the key information.

Remote Terminal Usage And Security

TRVL resides in the NFC mainframe computer. To access the mainframe, use your telecommunications network (e.g., FTS2000). For information about connecting to and disconnecting from the telecommunications network, see the instructions provided with your specific network.

Access security is designed to prevent unauthorized use of systems and databases. For information about access security, including user identification numbers (user ID's), passwords, and obtaining access to a specific system, see the Remote Terminal Usage procedure, Title VI, Chapter 2, Section 1.

Sign-On

To access TRVL online inquiry, display the NFC banner screen (**Figure 1**) on your terminal and respond to the prompts as follows:

1 Enter User ID (required, alphanumeric field; max. of 8 positions). Key in your assigned user ID (e.g., **NF999**). Press [Tab].

2 Password (required, alphanumeric field; 6 to 8 positions). Key in your password. The first position must be an alpha character. Your password is not displayed on the screen. Press [Tab].

3 New Password (alphanumeric field; 6 to 8 positions). This field is required if your current password has expired and the system requests a new password. However, you may change your password at any time (once per day) by keying in a new password. Key in your new password. Press [Tab].

4 Enter Application Name. Key in **TRVL** and press [Enter].

The NFC Menu Screen (**Figure 2**) is displayed. Press [Enter] again to display the TRVL Signon Screen.

The TRVL Signon Screen (**Figure 3**) is displayed, except when NFC needs to communicate special messages. In this case, the Electronic Access Bulletin Board screen is displayed. Read the message(s) shown then press [Enter] until the TRVL sign-on screen is displayed.

At the TRVL Signon Screen, press [Enter]. The Inquiry Menu Screen is displayed. Instructions for using the Inquiry Menu Screen (**Figure 5**) are shown below.

Operating Features

This section describes the system's design and special operating features.

System Design

TRVL online inquiry is designed with one menu from which you select options that display the different kinds of data for travelers in the TRVL database. Some options are made up of several screens (pages) of data. On Page 1 of each option, you must enter a social security number (SSNO or SSN) and/or an authorization number (Auth No) to display the data for a specific traveler. Then, to display the following pages or to return to the previous pages, you press the applicable program function (PF) key shown at the bottom of the screen. You cannot skip pages except to return to Page 1.

Task 70, Travel Auth/Advance covers temporary duty travel and relocation travel authorizations and advance requests. Page 1 of the task is the same for both types of travel. The pages that follow are determined by the type of authorization. If the authorization is for temporary duty travel Pages 2 through 4 (TDY) are displayed. If the authorization is for relocation travel Pages 2 through 6 (Reloc) are displayed.

If you do not know the traveler's social security number and/or authorization number, you can use the Name Search function [PF2] on the Inquiry Menu to search for this information before you select an option. See [Searching For A Social Security Number And/Or Authorization Number](#) for instructions on using this function.

You can use the Print Inquiry Report function [PF12] on the Inquiry Menu to print Report 3401, Travel History Inquiry (**Exhibit**). This report provides summary information on travel advance, voucher, and repayment activity for the identified traveler. See [Printing A Travel Inquiry Report](#) for instructions on using this function.

The TRVL database stores 2 years of TDY travel (plus the current year) and 3 years of relocation (plus the current year) data. All traveler records that are within these timeframes will be included on the Travel History Inquiry report. Periodically, NFC archives records that have aged beyond the 2- and 3-year timeframes. Copies of archived records can be obtained by contacting the NFC Travel and Transportation Section (TTS) at **504-255-4878**.

Many screens display fields that can be considered header information. This header information may include any combination of the elements listed below:

Batch No. The batch number is used to track documents processed in TRVL. Batch numbers are sequential and always begin with the last digit of the fiscal year in which the document was processed.

Entry Method. The method used to enter the document.

- I** NFC TRVL in-house entry
- R** Travel Online remote entry
- T** PC-TRVL transmission
- X** NFC TVCH entry (Old Travel System)

Entry ID. The user identification number of the person who entered the data.

Status. The status of the document.

Audit Status. The code, from the list below, for the audit status of the document.

- 1** Selected by statistical sample
- 2** Selected for reason
- 3** Received by TTS; audit in process
- 4** Audit complete

Status Date (Audit Date). The date the status or audit status was effective.

SSNO. The traveler's social security number.

Auth Number. The travel authorization number assigned by the agency.

Position	Description
1	The last digit of the fiscal year.
2	The type of authorization:
A	Unlimited open travel
B	Limited open travel
C	Individual trip travel
L	Local travel
N	Nationwide travel
3	S (single traveler) or M (multiple travelers).
4-5	The alphanumeric agency code of the agency paying the expenses.
6-9	The 4-position alphanumeric code unique to the agency.
10-13	The 4-position sequential number assigned by the agency.

Function Keys

Function keys are shown at the bottom of each screen. The action of the function keys varies by option. The applicable functions keys are described in the instructions for each option/task.

Systems Access Manual

To verify the usages of other keys for a specific screen, consult the PF Key legend at the bottom of the screen.

Inquiry Menu Screen

After you have accessed TRVL online inquiry, Screen TV21000, Inquiry Menu Screen (**Figure 5**) is displayed listing 11 tasks (options) that are used to view TRVL data. Tasks 70, 71, and 72 consist of several screens (pages) of different data detailing information from the travel authorization, advance, or voucher.

Following is a brief description of each task code:

70. Travel Auth/Advance. Used to view detailed authorization/advance data for either temporary duty (TDY) or relocation (Reloc) travel.

71. Travel Voucher (TDY). Used to view detailed travel voucher data for temporary duty travel.

72. Travel Voucher (RELOC). Used to view detailed travel voucher data for relocation travel.

73. 3rd Party Costs (TDY). Used to view payment data for temporary duty travel transportation costs paid through the Transportation System and the Government Transportation System (GVTS).

74. 3rd Party Costs (RELOC). Used to view payment data for relocation travel transportation costs paid through the Transportation System and GVTS.

75. Travel Advance History. Used to view summarized travel advance history.

76. Travel Voucher History. Used to view summarized travel voucher history.

77. YTD Relocation Summary. Used to view year-to-date data, by tax year, for travel expenses reimbursed to the traveler including taxable and nontaxable amounts.

78. Reloc Summary By Authorization. Used to view relocation summary data by authorization number.

79. Claim For RIT Allowance. Used to view detailed data for the traveler's relocation income tax (RIT) allowance claim.

7A. Demand Letter Data. Used to view a traveler's current outstanding advance amount and to query records created by the Excessive Advances Repayment Notice System (demand letter process).

To select a task on Screen TV21000, Inquiry Menu Screen, key in the appropriate task code and press [Enter]. The screen for the selected option is displayed. When the selected option has multiple screens, the first screen is displayed. In addition to the above options, you can select the Name Search (PF2) and Print Inquiry Report (PF12) functions from this menu.

The Name Search function is used to find a traveler's social security number (SSN), and/or authorization number (Auth No). The authorization number and social security number are the key data needed to display records. Instructions for using the name search function are found under **Searching For A Social Security Number And/Or Authorization Number**.

The Print Inquiry Report (PF12) is used to print Report TRVL 3401, Travelers History Inquiry Report (**Exhibit**). This report summarizes advance, voucher, and repayment activity for the identified traveler. Instructions for using the print inquiry report function are found under **Printing A Travel Inquiry Report**.

Travel Auth/Advance (Task 70)

Travel Authorization/Advance is Task 70 on Screen TV21000, Inquiry Menu Screen. This task contains several screens (pages) and is used to view authorization data for either temporary duty (TDY) or relocation travel. The first screen (Screen TV21400) applies to both TDY and relocation travel. After the first page, the information displayed depends on whether the authorization is for TDY or relocation travel.

Both TDY and relocation authorizations contain several pages of data. You can view amended authorizations, deleted authorizations, and voucher summaries. If a TDY authorization is for multiple travelers, a list of the travelers is also available.

Instructions follow for selecting and using the functions in this option.
