

FMS CPAIS Personal Property v. 1.6 Release Results Requests for Change (RFC) – February 23, 2018 (Scheduled)

All CRs were implemented successfully unless otherwise noted.

Change Request (RFC)	Description	Agency	Release Results
32936	Allow users the ability to query data on the Property form. All fields needed to perform a query were not available. Update will add the query to the Acquisition Amount field on the Property form to allow users the ability to query by the dollar amount. Users will also be able to run a report by range.	All	
32937	Correct the Accept button actions when transferring assets within the same agency. Currently users are forced to do accounting adjustments when transferring within the agency. They agency will be able to change the accounting at any time.	All	
32976	Add an 'Orig Acq Cost' field to the Property Form which will allow Property Managers the ability to manually enter cost/value data for non-traditional assets (assets not purchased). This new field will fulfill the property management needs and allow the accounting requirements for purchased assets to be unchanged.	All	
32982	Modify the Property form to not require the accounting code. This will allow Property Managers to complete non-traditional assets which do not have acquisition cost and do not require accounting codes.	All	

FMS CPAIS Personal Property v. 1.6 Release Results Action Items (AI) – February 23, 2018 (Scheduled)

All CRs were implemented successfully unless otherwise noted.

Change Request (AI)	Description	Agency	Release Results
32030	Add a new table to the Oracle Database to ensure that the Inspection and Operational data are maintained in separate tables. Also, modify the Inspection and Operational data tabs on the Property form so the odometer readings can be managed correctly and separately between the Operational and Inspection Data.	All	
32324	Update the APO_ID_RG LOV in the Property module to display the First Name before the Last Name. Also, update the database table "ACCOUNTABLE_PROPERTY_OFCRS" to correct the first/last name fields that are reversed.	All	
32393	Prevent the Property form from forfeiting an Asset ID if a user begins a Property record and does not save it. This will allow unsaved property record IDs to be available for the next successfully saved record.	All	
32536	Allow data displayed in the acquisition amount field to be displayed in the Original Acquisition Amount field when a Traditional asset is disposed. This will prevent the acquisition amount from changing to \$0 after an asset is disposed.	All	
32983	Combine all Receipt records into one Receipt record for all Staging records. Also, modify the nightly CPAIS load process to update the single existing receipt record (do not create additional Receipt records). This will allow Property Managers to create Assets from the Staging Area Records that have multiple receipt records.	All
