

GovTA Time and Attendance

GovTA is a Web-based Time and Attendance (T&A) application specially designed to meet the T&A reporting requirements for Federal Departments or Agencies and their employees. The application can be securely accessed with an Internet browser, allowing users the flexibility to enter T&A data from Government-issued devices with an Internet connection. Transaction Code (TC) and leave type tables are used to enter data in GovTA. Once approved, the timesheets are picked up on scheduled build files and transmitted to NFC for processing. Once received, these T&A files are edited using the Time and Attendance Validation System (TIME) job.

GovTA Functionality

GovTA is designed to adapt to the business rules/roles of the Agency or Department and can be quickly configured for changes in procedures or protocols.

Standard functionality includes:

- Automates T&As, offers leave management, and provides labor distribution capabilities.
- Provides T&A reports.
- Incorporates Premium Pay and Leave Request Functionality.
- Facilitates regulatory compliance by providing fully auditable processes.
- Offers real-time reporting together with ad hoc query and graphical analysis capabilities.
- Provides for a full accounting of the total workforce by enabling the tracking of employee time and matching it to programs, projects, and tasks.
- Allows for usage of multiple Accounting Codes.
