

Insight Quick Reference / Payroll Accounting System Subject Areas

What is Payroll Accounting System (PACS)?

- These 25 Subject Areas provide high-level time and attendance data, benefits transactions, and data on other payroll transactions.
- The PACS Subject Areas group the data into HR categories (similar to the PINQ screens in the mainframe).
- PACS data is searchable in *Insight* by either Pay Period Covered or Pay Period Processed.

History

PACS data dates back to Pay Period 1 of 2013.

Data Refresh*

Occurs bi-weekly after BEAR.

*View the *Insight* Data Refresh Report to determine the most recent date of refresh

Calendar Filters

- All PACS common reports require the user to select a PAY_PERIOD_PROCESSED prompt.
- When building an ad hoc PACS report, users can filter data by Pay Period Processed or Pay Period Covered.
- Pay Period Processed restricts data to show results based on the processed date, whereas Pay Period Covered restricts data based on the effective date of the transaction.

Payroll Accounting System Common Reports
